

A ORDINARY MONDRIAN BASELINE

ECFP classifiers

logistic | RF
extra trees | NB

Logit router

four component logits

Ordinary set

$s_0 = p, s_1 = 1 - p$
 $S_M(x)$ at 90%

B TWO LABEL-FREE TRANSPORT VIEWS

Physicochemical view

MW | logP
TPSA | counts

Score view

component
logits + router

Weighted sets

$S_{phys}(x)$ and $S_{score}(x)$

C COMPLETE TRANSPORT CERTIFICATE

PASS source/target ≥ 100

PASS class support ≥ 20

PASS ESS $\geq 25\%$

PASS clip $\leq 30\%$ /bound

PASS domain AUC $\leq .99$

PASS balance not worse

Both views pass?

all-view quorum

D ENVELOPE AND EXACT FALLBACK

PASS: protected-label consensus

$S_{TAME} = \bar{S}_M \cup \{0 : 0 \in S_{phys} \cap S_{score}\}$
Baseline labels are never removed

FAIL: exact fallback

$S_{TAME} = \bar{S}_M$
empty baseline $\rightarrow \{0, 1\}$

$S_{TAME} \supseteq S_M$ | no empty sets | no newly created singletons
Only singleton-to-defer transitions are permitted
